

WINDOWS MADE OF REHAU EURO-DESIGN 60

THE ECONOMIC SOLUTION WITH BRAND QUALITY

QUALITY AND ECONOMY

WINDOWS MADE OF REHAU EURO-DESIGN 60

LONGEVITY, DAMP PROTECTION AND DUST TIGHTNESS

ENJOY EVERY DAY AND SAVE ENERGY

The inner and outer pre-chambers provide good noise and thermal insulation.

3 chambers and a 60 mm construction depth

Windows are an investment for life: If you build or renovate a home and have to make an important decision and you value reliable quality and cost-effectiveness, you are making the right decision by choosing windows made of Euro-Design 60.

The economic solution at a high standard

Windows made of Euro-Design 60 are visually pleasing in any house with a smooth surface and elegant 15° chamfers. Two seals keep out draughts, dust and water ensuring pleasant living comfort. Euro-Design 60 window solutions are based on a 3-chamber system and have a construction depth of 60 mm, enabling them to be of dependable high quality and cost-effective.

Longevity and stability of value are characteristics of the material processing.

Durable, stable and easy to clean

You should enjoy your windows for a long time – effortlessly. That's why the manufacture and quality of windows made of Euro-Design 60 is first class. They are solid and, thanks to the high-quality surface, also easy to clean.

Windows made of Euro-Design 60 are only made with the highest quality materials and with utmost care. With their smooth surface and angular beading in the window frame, windows made of Euro-Design 60 are less susceptible to dirt and can be quickly and easily cleaned using water, a little washing-up liquid and a soft cloth.

The angular beading in the window frame allows for convenient cleaning.

Attractive and comfortable

The excellent thermal insulation properties of windows made of Euro-Design 60 ensure cosy living. Windows made of Euro-Design 60 have a construction depth of 60 mm and two seals that keep out the cold/warmth, dust and dampness.

Saving energy with thermal insulation

Windows made of Euro-Design 60 allow you to enjoy the comfort of your home even during harder climatic conditions. Thanks to the good thermal insulation value, the warmth or cold stays inside where it belongs. So enjoy cosy living and a low heating bill. Euro-Design 60 window profile systems are the ideal components for energy-saving houses and modernisations.

This quality-mark assures REHAU quality.

Excellent design and highest quality are the features of REHAU.

SHAPES AND ROLLER SHUTTER SYSTEMS

MATCHING YOUR STYLE OF BUILDING

Accent your building with shapes

Angular windows: Windows made of Euro-Design 60 provide you with suitable shapes and designs for many architectural situations. Windows in transom design emphasise the style of your house and appear particularly impressive inside and outside. The windows look elegant with the 15° profile angles.

You can be sure that your windows stylishly accent your living environment and are harmoniously integrated in the entire architecture of your home. Naturally a high level of thermal insulation is always included.

Recessed sash design

Roller shutter system Comfort-Design Plus provides you with sun protection, privacy and can help with undesirable visitors.

The roller shutter system Comfort-Design Plus provides you with a range of attractive advantages: From visual cover and light protection to thermal insulation. Burglary attempts can be hampered. Construction set 195 is available in classic white with a crank gear or electrical drive option and, if required, with an additional fly-screen.

*Elegant protection from light, heat and nosy parkers.
Comfort-Design Plus*

Fly-screen

The ideal combination:
Windows made of Euro-Design 60
and Comfort-Design Plus shutters.

SOUND INSULATION

INDIVIDUALLY MATCHED

Keeping it quiet

If it is loud outside, your home should be quiet inside. Windows made of Euro-Design 60 achieve this. Even if there are sources of very loud noise in your immediate vicinity.

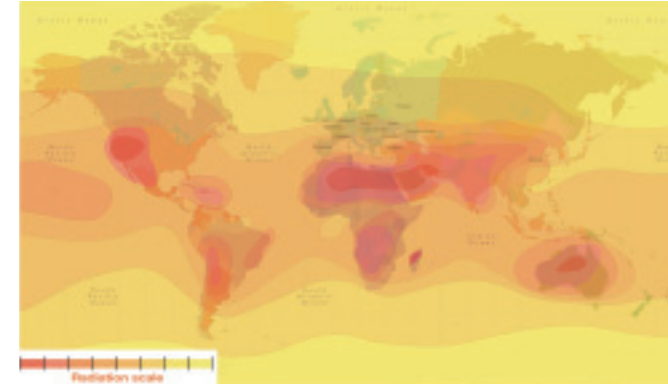

Windows made of Euro-Design 60 can be individually matched to your sound insulation requirements in residential areas that are particularly loud. So relax at home, even if the outside noise is excessive.

Traffic volume	Distance from house to centre of street	Recommended noise insulation value* of window	Achievable with Euro-Design 60
Quiet residential street 1500 vehicles/day	30-12 m	28-29 dB	✓
Quiet residential street 1500 vehicles/day	12-5 m	30-34 dB	✓
Main road 30,000 vehicles/day	150-80 m	35-39 dB	✓
Main road 30,000 vehicles/day	80-30 m	40-44 dB	✓

* Noise reduction level of a window

WINDOWS MADE OF REHAU EURO DESIGN 60

FOR CONTINUAL PLEASURE AT HOME

Material RAU-PVC 1476

RAU-PVC 1476 is REHAU's own UV and corrosion resistant formulation and it is suitable for use even under extreme climatic conditions. Windows made of RAU-PVC 1476 can be installed in regions experiencing up to 180 kcal/cm² per year radiation level. The RAU-PVC 1476 material is extremely weatherproof, protected against solar radiation, low-maintenance and continually contributes to the value of the property and enhancement of your house.

We demand the best

REHAU only works with experienced window specialists. You are in safe hands with these specialists who can expertly advise you on buildings with special architectural features. This includes both new build and refurbishment projects – from the design, functional properties such as heat and noise insulation to burglary prevention. The windows are manufactured, delivered and installed exactly to your specifications. Your window specialist will be glad to continue to cater to your needs after installation.

Experience creates quality

REHAU has been developing and producing profile systems for windows, facades and doors, as well as for roller shutter systems, for over four decades. Our principles include innovative thinking, pragmatism and a traditional high level of quality.

To achieve this, the experts at REHAU also use valuable specialist knowhow obtained from the building services engineering and civil engineering sectors, in which the company has also been globally active for many a year. This synergy, plus close partnership with window fabricator companies, many of the employees of which have undergone training at the REHAU Academy, has made REHAU the leading manufacturer of profile systems for windows, facades, doors and roller shutter systems.
